14th Home Making Exhibition

25–29 March 2026

HOME MAKING THEMED EXHIBITION GROUP

The CONSTRUMA and HOMEDesign building and home making exhibitions are prominent professional forums in Hungary and the Central and Eastern European region.

Held every spring, the event covers the entire spectrum of home making, from construction and building engineering to interior design.

The exhibitions have a dual target audience: the professional days, enriched with conference programmes, are followed by a weekend focusing on the needs of the general public.

CONSTRUMA 44th International Building Trade Exhibition

CONSTRUMA is Hungary's leading construction industry trade exhibition, where the latest trends in construction and renovation are in the spotlight and modern building materials, energy-efficient solutions and smart technologies are showcased in one place.

At the event, both professionals and end users will find the tools, ideas, practical examples and expertise to create timeless, energy-efficient and comfortable homes.

The spring event, complemented by the garden theme, also showcases the potential of the outdoor environment surrounding the home and its close connection to the indoor living space.

HOMEDESIGN 14th Home making Exhibition

The jewel in the crown of home making exhibitions is HOMEDesign Home Making Exhibition, where you can find everything from kitchens and bathrooms to living rooms, all you need to create a stylish and functional home. The exhibition focuses on the latest domestic and international interior design and design trends. The interior-designed spaces are not only spectacular – they evoke real homes, allowing visitors to experience first-hand how these trends become tangible, inspiring solutions in everyday living spaces.
